## IN1010 Data Modeling Exercise 3 - Movies

This exercise is a bit more conceptual.

Movies have an ID, a title and a release date. Actors have an ID, a name, and a date of birth. Directors have an ID, a name and a date of birth. Movies have many actors, actors can act in many movies, movies can have more than one director, and directors can direct many movies.

Develop data model in Visual Paradigm to represent the above scenario. Bookings Members Unique Booking ID bigint(19) Unique Membership Number integer (10 000000) Starts Date Name varchar(255) Adress
DOB Number Of Days smallint(1) varchar(255) Club Points integer(10) Cars Registration Number Model Milage integer(10) integer(10) Band integer(10) BookingsUnique Booking ID bigint(19)
